

Prolnert Hush Nozzle

DATA SHEET

FORM NO. 04-07 ISSUE NO. 21.0

DESCRIPTION

The “Hush” nozzle is a new Prolnert innovation with a proprietary mesh interior designed to reduce noise levels during a discharge of the system. While the Prolnert constant flow valve already delivers a lower pressure discharge of 42 bar compared to the industry average of 72 bar, the product now operates at significantly reduced noise levels that will not harm equipment

- Reduces decible levels – safer for IT equipment
- Constant and uncompromised performance
- Standard 1/2” (12mm) BSPT
- Replaces a 1/2” (12mm) nozzle only

SPECIFICATIONS

Material: Stainless Steel Shell
 Dimensions: 230 mm in length, 102 mm OD,
 ½ inch BSPT pipe connection
 maximum orifice size 10 mm.
