BATTERY FIRE BLANKETS

SPECIFICALLY DESIGNED FOR LITHIUM ION BATTERY PACKS

AVD Fire a division of Dupré Minerals Ltd have developed a specialist range of fire blankets specifically for the Lithium-ion battery market. Our Blankets are capable of withstanding extremely high temperatures for a prolonged period of time as well as being robust enough to offer protection against potential debris and shrapnel expelled during a battery fire event.

These qualities make our Lithium-ion battery fire blankets an important part of your passive fire protection strategy.

If your organization is connected to the production storage and transportation of lithium-ion batteries and associated devices you will need a comprehensive strategy which incorporates passive and active fire suppression systems.

Easy to store and easy to deploy.

Available in a wide variety of sizes, please contact us with your requirements.

TYPICAL PROPERTIES

- Working temperature up to 1000°C
- Fire resistant technical fabrics
- Fire resistant re-enforced multi-layered edge lining
- Fire resistant industrial stitching
- Handling loops on all corners

LITH/EX

PATENTED FIRE EXTINGUISHER

- Easy to operate
- Controls flames
- Cools excessive heat
- Prevents re-ignition
